I modelled a Sex Pistols bobble head from Jojo's Bizzare Adventure - Golden Wind! Thought the character would look cool bobbing while riding a bullet. The figure uses two springs for double bobble action. Comes in four parts; the head, body/half bullet, bottom bullet half and base.

For best detail, print at 0.1mm layer height with a well calibrated printer. Could also be printed on a resin printer.

The diameter for the bottom spring is 9mm and the top is 5mm.

3D modelled in Blender.
