### Sock it to me!

Why roll your no-show socks into a pile of lumps that would make Marie Kondo recoil in horror, when you can help them keep their shape with this quick-printing insert?

Yes, it's immensely and weirdly obsessive, but there's no arguing with the results. In addition to making your sock drawer look awesome, this insert will prevent your favourite no-show socks from shrinking too much after washing while keeping the elastic around the ankle from getting too loose.

The shape of the design is based on the insert that comes with with Uniqlo socks, so it's not going to damage or stretch them.

## How to Print

This print works best if you print with thick lines, no top or bottom layer, and a cool-looking infill of your choice. The image above was printed with a 0.8mm line width, five perimeters, and a 10% honeycomb infill. Prints in 16 minutes!
