Summary

These are salt and pepper shakers that I designed.

[Household](#) > [Kitchen](#)

Tags: [salt](#) [saltshaker](#) [pepper](#) [saltandpepper](#)

I was looking for relatively large holes allowing the salt to flow easily. I also wanted a salt shaker that could be filled from the top. Then I added a pepper shaker to match. I printed them on PLA with 0.15 mm height. They print without supports.
