This is a lazy remix from <https://www.thingiverse.com/thing:3537527>

Didn't need the holes for the needle files, or the screwdriver, or whatever that round thing is in the original, so i shortened it up and made the slot for the scraper just wide enough that it can slip through and not shake and rattle around while the printer's running.

Printed on the side with tree supports under the overhangs only. Not the holes, and definitely not in the slot.

Print Settings

Printer Brand:

Creality
