351 guitar pick with embedded 5x1mm magnet and a logo that acts as a grip.

Printed in Printbed brand PLA with a 0.4mm nozzle @ 0.10 layer height.

If using a magnetic nozzle I suggest applying superglue to where the magnet sits and letting it dry for a minute or so before resuming the print, or the magnet might decide to hug your nozzle.

Now in 1.2, 1.0, 0.8, 0.6, 0.4 thickness.
