## Summary

An unobtrusive wall mount for hair straighteners with a soft TPU contact surface.

[Household](#) > [Bathroom](#)

Tags: [wallmount](#) [straightener](#) [hair](#) [h2d](#)

I was looking for a hair straightener wall mount that was:

- small
- quick and easy to holster
- unlikely to scratch the hair straightener

The model is a H2D Linear II. I am not sure if the design would need any tweaks to fit other models. Let me know if you try it!

If you don't have TPU for the contact surface, you can merge the two files into a single piece before printing.

Printed the base at 0.2mm 30% infill. TPU at 0.2mm 5% infill.
