This is a Hose adapter for a 60mm hose to a 35mm vacuum connection. Younger brother is making a dust collector/extractor unit and asked if I could design a adapter for him to be able to facilitate the hose to vacuum adapter variance. He gave me the wrong dimensions, so I have made this one which works for his setup (he told me hose was 50mm but it's actually 60mm).

I have printed this once so far. I printed vertical which resulted in supports across the entirety of the hose end thread which took a while to remove. Just like my 50mm to 35mm design.

Pictures are indicative only, These are the pictures from my small adapter, this design has a larger variance between the hose and vacuum ends.
