### Summary

minimalistic HomePod mini stand - include support

1.90 hrs

1 pcs

0.20 mm

0.40 mm

PLA

16 g

Prusa  
MK3/S/S+

[Gadgets](#) > [Audio](#)

Tags: [apple](#) [minimalistic](#)

Edit: added the Fusion360 file and a step file

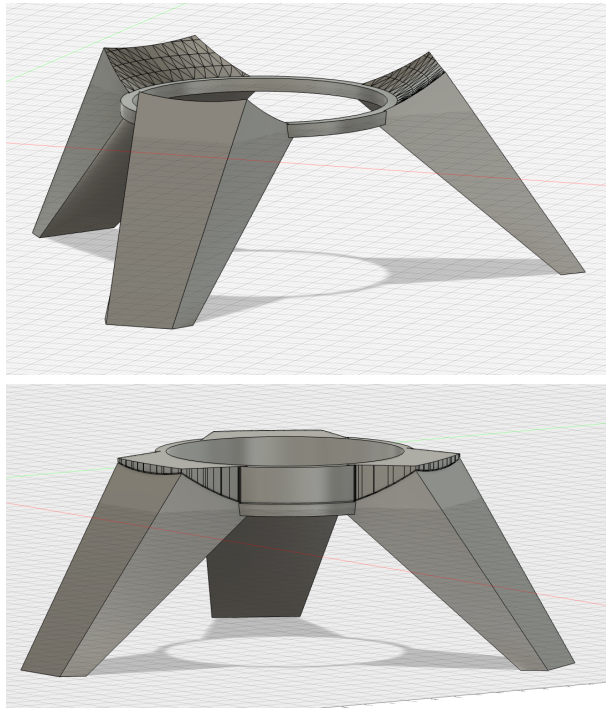

After using it for a while, the ring of the stand bend under the weight of the homepod.

So I am not that happy with this design.... feel free to remix it

There are some cool wooden stand designs out there.

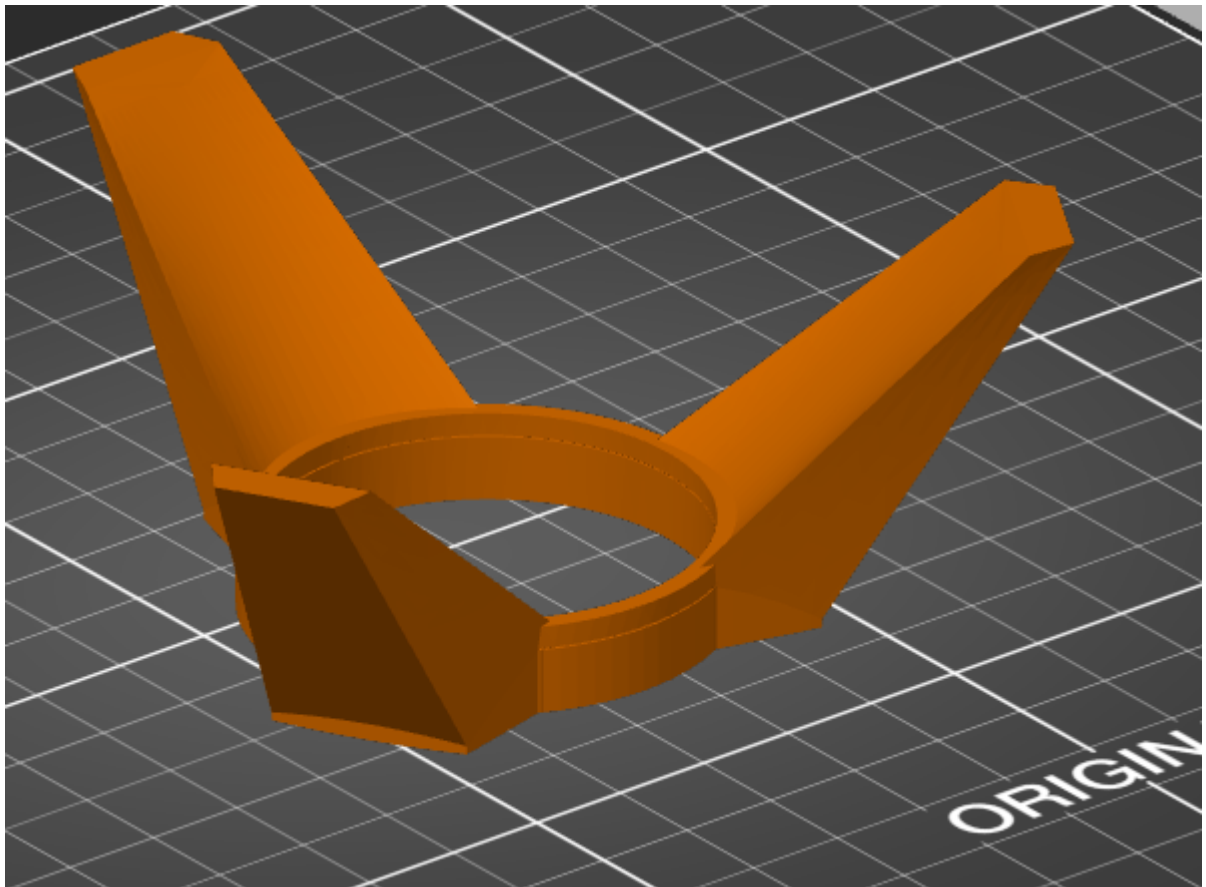

They are minimalistic, hot, sometimes awesome handcrafted and ... expensive

So I designed one.

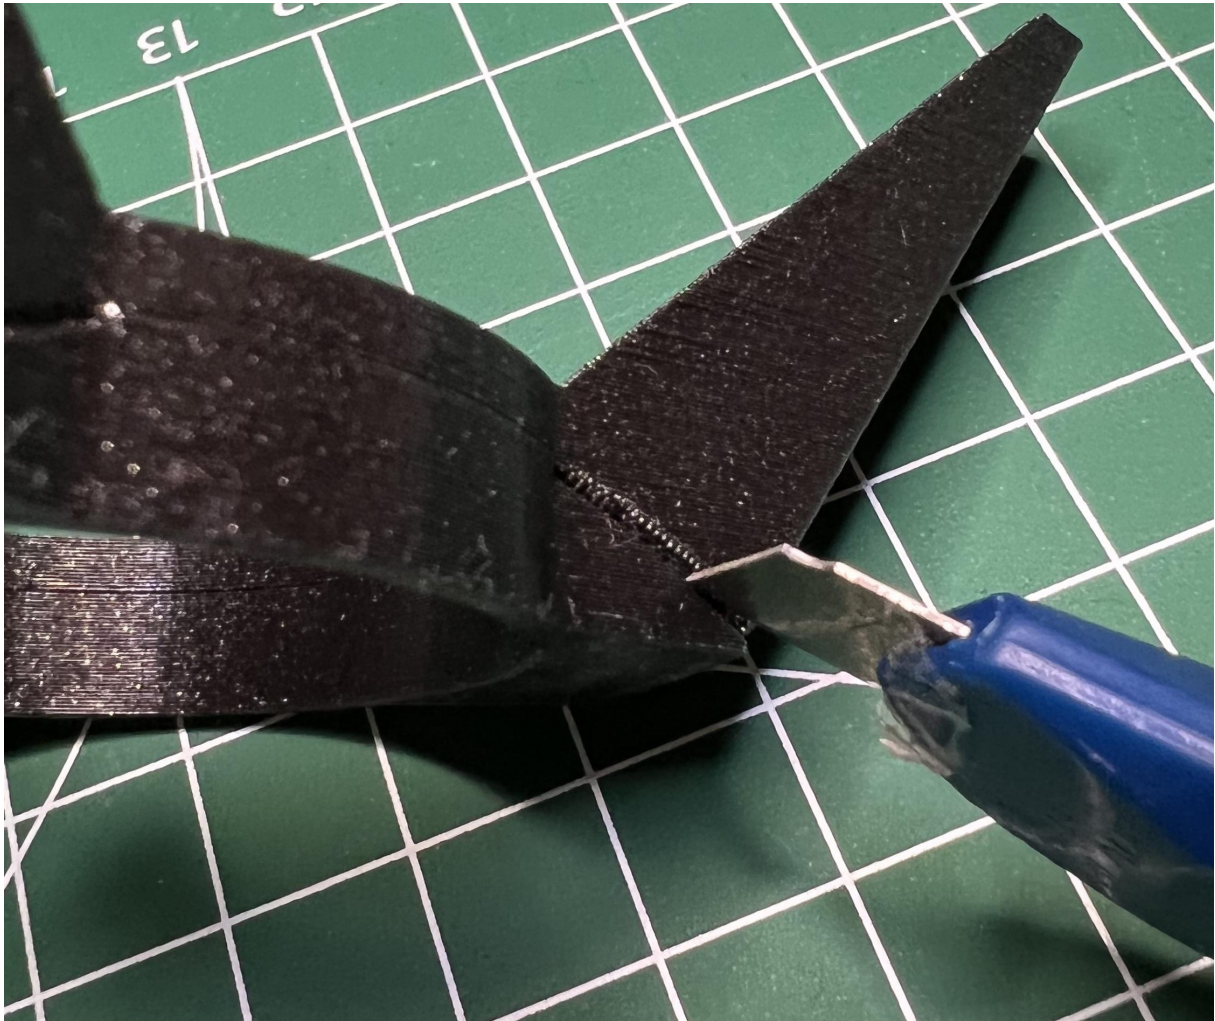

To make this easy to print, I include the support. There is a 0.2 gap between the stand and the support.

Of course you are able to print it with your own support. Just choose the right stl by name.

Just printing it upside down.

I tested it with PLA and PETG at 0.2 mm.

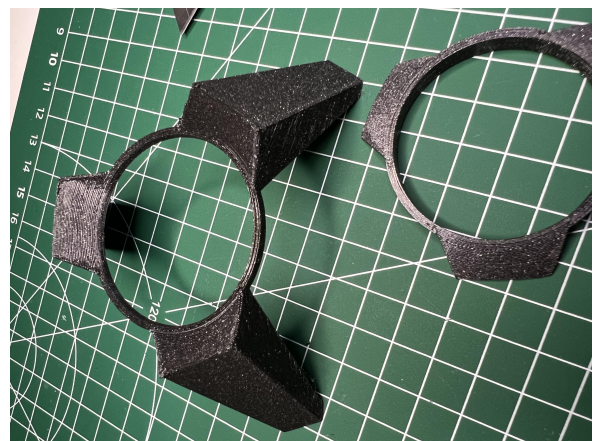

To remove the support, carefully use a cutter knife at the edges, like shown at the picture.

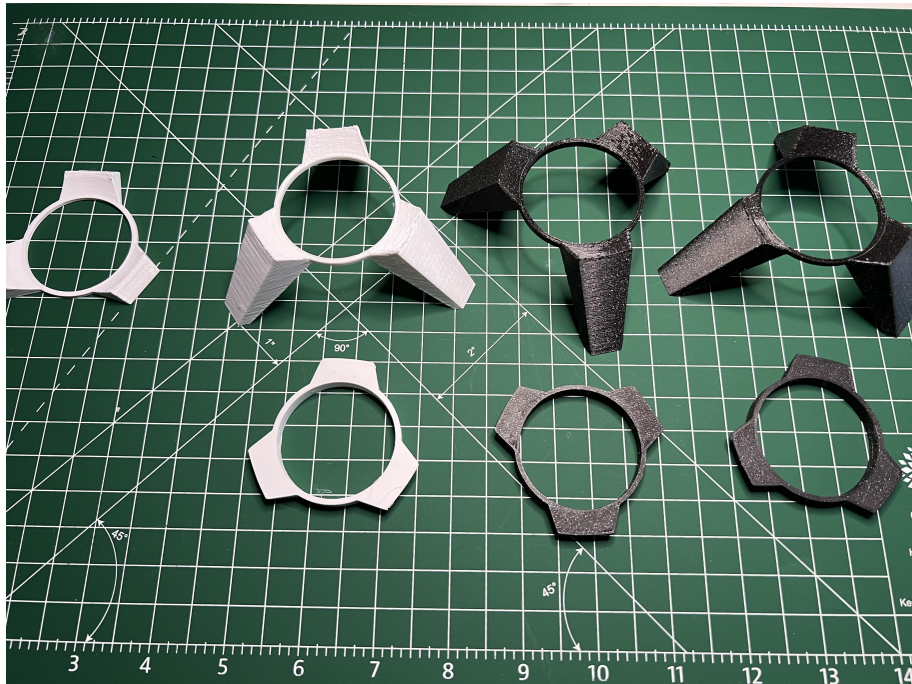

Special thanks to [WayToApp@Thingiverse](#) for creating a HomePod mini Model I used to create this stand.

HomePod mini - of course is a registered trademark by apple

Outtakes ... iterations
