A small model I've customized to be cute and fun.

The large blank space can be used to add custom text or a logo with the negative volume feature of PrusaSlicer.

I usually print out a few with extra filament and carry them around so I can give to people who have a bike that matches the color.

Can be assembled with or without glue. Glue would make it more permanent though.

I guess I recommend ironing the top surface just to make it look nicer.
