Summary

A special need for me, a stand to go in the window slides where i can dry my shoes

Tags: [shoe](#) [shoes](#) [dryingrack](#) [drying](#)

This is a bit of a “special” one, but might come handy for someone else perhaps.

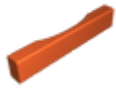

I have some slides for where my windows open, so i did a simple design to use the slide to insert the “mount” and then in the “mount” stick two “arms” one for each shoe.

And it is a drying stand :)

I think the images might be a better explanation but... ;)

Infill i did at 20% and 4 walls
