Summary

Yet another bee feeder with bottle shifted to a side to be able to attach to a fence

[Household](#) > [Outdoor & Garden](#)

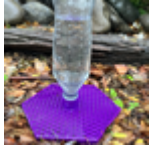

Tags: [feeder](#) [bee](#) [bees](#)

(Technically this is designed from scratch, but it was obviously heavily inspired by NicG's one, so I'm marking this as a remix)

After seeing NicG's bee feeder, wanted one myself and thought it'd be neat way to practice cad.

Had to change some things up and decided that I want to hang this one on a fence, so shifted bottle position to a side. (I've attached it to a fence with just metal wire, because I was a bit too lazy to design some holder and it's hard to design one for multiple type of fences, since I intended to upload this here to begin with)

This remix is based on

Awesome Bee Feeder!
