Extruder Mount here: <https://www.thingiverse.com/thing:4259308>

I own one, it's well build and the filament path appears to very constrained, the cooling fins are CNC machined, and the back of the extruder is made from plastic, it it's surprisingly light but very chunky.

Please consider donating a pizza or a spool of filament.

This is my own review in case you want to buy one, and I am in no way related to the seller.

Category: 3D Printer Extruders
