These are Softball Earrings. The .gcode has 9 layers of Red 1 layer of Neon Green (shown on the left) or White (shown on the right), and 7 layers of Fluorescent Yellow to finish it off. The red was over powering the yellow initially so a transfer color had to be added. There are 2 filament changes added to the program. This is a little thicker (0.4mm) than the baseball earrings. For the Ender 3 Pro I used the "Pause at Height" command to achieve the filament change without blobbing.

Please Post your makes so I can see them and list any mods you do so we can see how they turn out.
