### Overview

I was sick of searching for the tape when wanting to print PETG on my glass bed.

It has 3 rollers that you squeeze together to push the tape on. The rollers are Print in Place, which is why supports are needed.

Holds a standard 25mm width by 76mm inner diameter painters tape roll.

### V2 UPDATE 2020-09-11

- Snug fit for mount interface with aluminum extrusion
- Longer tear arm to get a finger in between a full roll and tear arm

- slimmer mount block

## Print Settings

### Printer Brand:

Creality

### Printer:

Ender 3 Pro

### Rafts:

Doesn't Matter

### Supports:

Yes

### Resolution:

0.2

### Infill:
