Works as a great first print, and creates a swatch collection!

I made some adjustments to the size and font of the original so the tag is smaller and the font stands out a bit more.

Customizing done via Autodesk Fusion 360. I use the free version for this.

- Open Filament Tag Sample.f3d
- expand Sketches > right click Sketch1 > Edit Sketch
- Double click a letter

- Edit Text
 - I like 2 spaces at start of each line
- Click Finish Sketch
- Save
- Export as STL and slice.

I have also included a sample STL and gcode for a Prusament Galaxy Silver filament tag.

This remix is based on

Filament Tag (customizable)
