updated 17. 5. 2022 | published 17. 5. 2022

### Summary

Continues the angle at which the entry ramp is designed for, instead of taking a right turn like the factory chute.

[Household](#) > [Outdoor & Garden](#)

I printed without supports and it built just fine. This will require several screws to be installed in the rear plastic housing. I used 1/2" length wood screws with a small pilot hole. The chute works really well, but must be uninstalled for storage. Use a piece of bent aluminum flat bar to keep the rear spring door up (see pics).
