Catan Tile Holders with Links to Everything for the game

This is a BIG project I just finished. I wanted to create a carry case for my 3d Catan set, and I needed tile holders. I didn't love any of the ones that I saw here on Thingiverse because all of them seem to have spacers for the pieces or fixed locations for ore vs wood....whatever. I wanted holders that would allow you to set your own spacing. So I designed these to go with the set of magnetic tiles created by Dakanzla. When I dedicated myself to building a 3D Catan set, there were a lot of choices on the Verse, and I had to look through many MANY posts to make my decisions. So, for those of you just now making that decision, I've decided to provide links here to EVERYTHING I used for my version of this game. You will find the links below to these. This set of tile holders also has a compartment to hold the Longest Road, Number Chits, Largest Army, Thief, and Dice. The exact ones that this tray was designed for are also available at the links below.

Everything pictured above, with the exception of the box, which I build out of wood, is available at the links below. If you want to know where to get the latch or other fittings seen on the box, please message me and I will link you to them.
