This is a boarder for the 3d Catan set with magnet bases available here on Thingiverse. <https://www.thingiverse.com/thing:1238980>. Follow me if you are planning to build a 3d Catan set, because I will be posting game trays and plans for a container.

The difference between this boarder and others that have been made is two fold:

1. This boarder has a configuration for both 4 and 6 player.
2. This boarder is designed to use your water tiles.

You may have to play around with the size of these for your set. I remember having to print mine at like...98.9% or something, due to slight variations in the tile sizes. So print one boarder at a time until you feel like

you have the exact right size. Mine is a very tight fit, so you should scale it to fit tight.

There is an image above of the erected borders that is color coded.

Dark Green=6layerAdapter

Light Green=BasicEdge6Playert

Purple=BasicEdge1

Orange=DoubleMale

The diagrams show how the Double Male slots in a different place depending on which configuration you are building.

I hope you find this as useful as I have.
