So...this is a simple print of a plaque to create building cost cards for your 3d Catan game. You will find, in the images, a card image for each of the 6 colors. These can be printed on adhesive backed paper and then cut out and pasted to the printed plaques. They should print at 100%, but if they are too small or too big on your system, they need to be printed at

69.4 mm x 91.5 mm. I recommend clear coating them once you have them mounted to the plaques. You will find game pieces that match the images on the card prints here: <https://www.thingiverse.com/thing:935856>

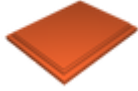

Except for the settlements, which I modified to get rid of the huge bell tower. That is a downloadable file here. If you are building a 3d Settlers game, you may want to follow me. I'm going to be uploading a "all in one" set with holders soon.
