Simple, board-style shoulder stock usually attached to artillery Luger. This is NOT a perfect replica.

Tested on WE Tech GBB Luger, but should work on any post-1906 pattern gun. You can strengthen the dovetail rail with brass insert, but since no one sell them locally I substitute it with 2.5cm fischer anchor.

BEWARE! The connector tolerance is tight. Might scrap some paint on model gun!

I had someone else printed this for me, so I can't give any advice for printer settings yet.
