I ran out of these clips so made a printable version. It's parametric so if your tubing is different or can't get the same size nails you can change it. Freecad source attached. (modify the spreadsheet values). The original had the nail holder in the center, but I moved it to one side so it will print without support.

This is updated to be compatible with standard US 4D nails. If your local nails are different, modify away and post a remix!
