Summary

can crusher for red bull 250ml can only!!!

[Household](#) > [Kitchen](#)

Tags: [can](#) [crusher](#)

can crusher for red bull 250ml can only! - but you can adjust it to your needs!

as the autor of the original i sugest to print with 20% infill (gyroid) and a few walls & top bottom layers for rigidity. maybe wanna consider to make it out of petg!

i also eliminate some constructional weaknes of the design as you can see in the last picture.

PS: added a v2 holder - a bit taller and +1mm in x and y helps crushed cans getting easier out

This remix is based on
