This filament path was designed for reliable feeding and for a v6 E3D.

Updated for 2019 to be more rigid and to allow for use of two 3mm brass inserts to put in screw to make hot-end be fixed in place more solidly.

<https://www.amazon.com/gp/product/B07DQBNF97>

It is based on the v2 from Github, but remodeled and enhanced to have a snap-in fit for the hot-end that is snug, but yet not overly so, to allow for maintenance.
