This is a remix of the excellent replica model by Nap Bollemeijer.

Note that he converted this to metric and rounded to 0.05mm, so it is not to mil-spec. This makes it unsuitable for using to make a real gun, but is a great plastic display model.

I am not including his original model, but rather my remix which is dovetailed into two parts so that it can be printed on a 5.5 inch SLA printer. There are two versions. One for which you can orient yourself, and the other which was pre-oriented in Netfabb with what it thinks is the angles that need minimal support.
