This gives a FoodSaver VP112S a FoodSaver port. You still need the hose.

Note that the VP112S will draw an 80% vacuum through this in about 8 seconds, so best to press the stop button after 10 seconds or else you risk cracking some FoodSaver containers. 10 seconds should have no risk, but I cracked one after about 50 seconds.

Note that this is best used with an optional o-ring of size 7/8" ID and 1" OD by 1/16" width. You can buy these at Home Depot. O-ring is not included because ShapeWays just ships the 3D-printed part.
