Summary

Modified the version by DrStreet to remove the hole in the side.

[3D Printers](#) > [Accessories](#)

Tags: [cover](#) [creality](#) [dragon](#) [logo](#)

Modified the [original](#) by [DrStreet](#) to remove the hole in the side, as the X-stop cable is too big for the original hole for me and there's room enough for the cable still anyways. Also rotated the model so that it can print without supports(even though you can just do that in your slicer). Print the insert from [DrStreet's original thing](#).

[Updated 02/07/2020] - Added a version with a cutout on the bottom so that you can run the X-axis end stop cable through there.

Print Settings

Printer Brand:

Creality
