I had the idea to make a Gameboy cart that looked like a NES cart. The front need to be printed without any support but the back can be printed with a brim and support.

The label you will need to scale it to be 30mm wide and the rest will follow.

There are 2 different carts tops nes_gameboy_cart_top10 which is a thicker top which wont work with gameboy carts that have more chips on them. Use nes_gameboy_cart_top13 if your cart has a lot of chips and or a battery for saves.
