Update 28.11.2024:

New better Beta Version with connector.

Update 28.04.2024:

As requested by a user, i added the first BETA version of the trackholder with connector. Due to the support, the surface is unfortunately not 100% beautiful, but the function is given. The surface can be seen in the picture. I will try a bit more with the custom supports.

The BETA trackholder can be printed separately using the custom print profile. Support is already included in the model and must be removed after printing

Update 10.03.2024:

I removed the old version. Please use the new one.

Update 02.03.2024:

I made the base a little tighter so that it doesn't come off the Duplo bricks so easily. The Hot Wheel adapter has been completely redesigned and should now stay in place more securely.

This model is used to connect Hot Wheels rails to Duplo stones. For this purpose, the Duplo hinge was copied and the adapter "Hot Wheels on Duplo Blocks" available at Thingiverse was modified. So the adapter can be used alone with the original Duplo hinge or with the one offered here.

Have fun with the reprint.
