This simple little latch blocker can be mounted on a gate with small latch.

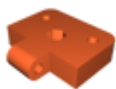

It is toddler proof*. But I believe a dog, cat or any other animal will not be able to open it as well.

For assembly you need:

- 2x Square nut M3
- 1x Bolt M3x25
- 1x Bolt M3x15
- 2x Screws M3

*aprx. age is up to 2y, then a toddler is mostly higher than the gate and clever enough to solve it :)
