The OmniLite Ti stove can be packed to a small package. This set of flex prints gives a little more protection. It helps avoiding piercing sacks into which the stove is packed. It also holds the fuel line for easier packing.

The [valve cap](#) is another model to print.

### Print Instructions

The models must be printed with flex material, as they require some bending to snap onto the stove.

Printer	MK3s+
Filament	Filatech FileFlex40
Infill	100%
Supports	None
