I think I still have scraps of my very first roll of filament. I remember it was natural PLA because that's the only color I could afford at the time. Now I have plenty of filament on my shelf but I still consider it a waste to not use the whole roll.

Here are twelve fun bits of treasure for you to print and keep forever and ever.

Now you may be asking, how is this not just garbage? Well one man's garbage is another man's treasure. In reality these are just props for the treasure chest I made earlier.

Use PRUSA Slicer to split the gems into objects and pick the one best suited to the color you want to use.

Enjoy!
