This is a ranger I designed in Desktop Hero, Fusion 360, and Meshmixer for my sister. It will need heavy supports, but looks great when finished. The bow is somewhat frail, so this file might be better used for online tabletop games rather than physical ones. I will repair this file to be stronger soon. It has been remixed from Pellinor1's arrows:

<https://www.thingiverse.com/thing:4701968>

and one of OxProps' arrowheads:

<https://www.thingiverse.com/thing:3705495>

Rangers are the type of character you want when you wish to do a bit of magic, track things, and attack things almost exclusively with a bow (or two swords). It is animal/nature related, but not as animal/nature dependent as the druid class.

This is licensed as non-commercial, but if you wish to sell this file, either digitally or physically, please private message me. If you have any suggestions for character design, you are welcome to comment or message me.

If you would like to support me and my work, please like and download. Donations/tips is not currently functioning, but hopefully will be repaired soon.
