Because there aren't enough of these in the world, right? Fun bit in FreeCAD, printed and epoxied. Holds short things, I guess?

Best printed with a really fat nozzle (0.8mm) and thin layers (0.12mm) to help the more horizontal bits stay together.

## Print Settings

### Printer Brand:

Creality

### Printer:

Ender 3

### Rafts:

No

**Supports:**

No
