Summary

Carabiner

[Gadgets](#) > [Other Gadgets](#)

Tags: [clip](#)

I designed this to affix my dogs poo bags to the handle of her leash.

It can be used for many attachment needs.

Recommended settings:

0.2mm layer height (I like to set the threaded section to print at 0.1mm)

2-4 shells

25% infill

UPDATED to R1:

The original version had a fillet at the top and bottom of the threaded latch.

I have printed this design many times with no issues, but realized that the bottom fillet could encounter printing issues when up-scaled.

The R1 update has a chamfer that will be easier to print at any scale and also increases bed adhesion.
