### MacBook Air (13" A1466) Camera Security Covers

The Camera Security Cover is precisely designed to securely and snugly fit your MacBook Air display lid - it will not slide or fall off accidentally. It has a ridge that 'clips' onto the inside edge of the lid between the bezel and the screen. Slide it left or right to allow the camera to 'see' and cover the camera again when done. To remove, simply lift up on the bottom edge to disengage the ridge and remove.

## Print Settings

### Printer:

Sovol SV01

### Rafts:

No

**Supports:**

No

**Resolution:**

.20 mm

**Infill:**

0%

**Filament:**

Canada3D PLA

Light Blue

**Notes:**

I print this with two walls and no infill

Category: Computer
