Summary

I designed this because every tube of CA I open would eventually dry up at the nozzle. But now I get every last drop!

I designed this because every tube of CA I open would eventually dry up at the nozzle. But now I get every last drop! Such a simple design you'll want to keep CA everywhere.

I made a 30mm (standard) and 40mm base. Simply slide in the CA at the folded end of the tube. Enjoy!
