Summary

Simple two part print, great for keeping your soap or sponge off of the counter.

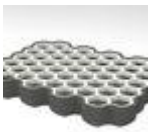

Household > Bathroom

Tags: bathroom kitchen soap soapdish soapholder soaptray sponge spongecaddy spongedrainer spongeholder

Two part print, can be printed in any material. Lower heat filaments might warp in the presence of hot water, probably not dishwasher safe unless done with low temperatures. A lower layer height is recommended to avoid spots for water to gather between layers.

Remix of my earlier design, this time with tabs added to the dish to hold the tray in place. Credit to user Mahooja for the suggestion!
