This is my Travel Soap Box.
This has been tried and tested on many of my travels by both myself and my son.
The pictures are of my actual well travelled Soap Box, over 2 years old

now.
The box holds a full normal size bar of soap, the tray insert flips upside down when closing for storage and still lifts the soap from the base of the box to keep it dry.
When at your destination open the lid and place the main box / base inside the lid (This save a lot of space). Then flip the tray insert over and place your soap bar back on top.
This way the soap is lifted up high and easy to grab with wet hands when at the sink.
There are two versions, one is multicoloured (Two Colours) as shown in the pictures. The other is a single colour version.
My multicolour was printed with PLA Woodfill and PLA Copper. The woodfill gives it a very nice feel, and the copper gives it some nice highlights. The Tray is PLA Silver Silk.
The Multicoloured Base & Lid can be printed at the same time, the colour changes match up on both the Base & Lid. This saves on time as there are only 18 tool changes and a small mostly hollow wipe tower. Mine was printed at 0.2mm

I am looking forward to seeing the different colour makes, so please post them here for all to see.
