Summary

Three variations of soap dishes. Two are two parts with built-in drainage. Pick whatever suit you.

I got **three versions** of dishes to suit your convenience: one for simple yet efficient (soap1.stl) and two others that come with bases with **built-in drainage** to place next to your sink or bathtub.

For the two bases you have the option of having the two parts stack(soap2.stl) or insert(soap3.stl). Whatever visually looks better.
