Remixed files of "Grey Wolf Specimen by University of Victoria Libraries" scans. The files are modified to be a wearable skull mask for costuming. The files are scaled to fit an average adult head, feel free to scale for your own comfort. I slightly enlarged the eyes for wearer vision, and added in a hinge mechanism for an articulated jaw. You will need to drill out holes to install springs.

The model is sliced for easier 3D printing. I added in alignment slots for accurate alignment when assembling the model. The files fit on a print bed with a 300x300x400mm build volume.
