A Dewalt tool holder that should work with most Dewalt tools that use an XR battery.

This holder replaces the battery in the tool so that it can be mounted to a wall for easy and convenient storage. I currently use this to mount my 4" grinder (DCG405) and multitool (DCS355) to a wall. The multitool does require an extra spacer to increase the distance from the wall which I have included.

There are 2 versions, they are essentially the same but one is rotated 90 degrees for things like drills where the spacer would have to be too big.

If you have printed this model and like it, why not consider buying me a coffee.
