Intro

I was looking for a flexi-cat for giving it as a present to a cat lover, and I could not find a single-color one, so I took the [Mult-color Flexi Cat](#) by [K7ZPJ](#) and adapted it to be printed using my Prusa Mini+.
The original author is [Fekete Imre](#) on his model in [Thingiverse](#).

The **remix** I did was to add an eye hole, that can be used for hanging it as a key tag.

Printing Info

- Original Prusa Mini+
- eSUN PLA+ Filament, 1.75mm
- Prusa Slicer using generic PLA profile.
- Took 6.78m of filament, 2:20:25 to print.

Last Words

- I hope you like this model and if you like it, please give it a like, it will make my day and will allow me to get a Prusa mug.
- Don't hesitate to post your makes including comments that can improve the model.
- You are kindly invited to follow me to get updated every time I upload a new model.

And the most important: Happy printing & Greetings from the Galilee.
