A better more robust version of the GoPro tripod mount (with an editable file)

This GoPro tripod mount design provides superior strength and durability and outperforms all vertical designs.

Optimized for the strongest printed orientation to avoid inter-layer failure of vertical printed versions.

Instead of braking on the layers line, this design warps.

I've kept the design as similar to the original as possible

This updated design ensures that your mount will hold up to the toughest conditions.

No support is needed.

Fusion 360 Editable file attached

Don't change the part orientation!

Print in current position!!!

Printed without supports,

Recommended at least 4 perimeters

I used original screw insert.

Print Settings:

Rafts:

No

Supports:

No

Infill:

100

Category: Camera
