I wanted to try out the new Continuity Camera feature with the iOS 16 and macOS Ventura betas, so I made my own mount!

This was designed around the 2021 14" MacBook Pro and the Apple Studio Display, but might fit other MacBooks and monitors.

Here's the version without the charger: <https://www.printables.com/model/223040-magsafe-iphone-holder-for-continuity-camera-in-mac>

It's a pretty snug fit, I didn't end up needing any glue.
