Propeller Holder for DJI Mini 2

Should also fit DJI Mini SE and Mavic Mini and Mini 4k, although not tested. Please share if you try.

Can be printed with PETG/PLA/etc or flexible filaments like TPU.

I recommend changing no. of perimeters to 4. With a 0.4mm nozzle, this will eliminate all infill.

2mm x 20mm slots for velcro, elastic, etc.

OR... use this printed strap by [@DougDieter_1297604](#)

UPDATE - V2: I have uploaded a new version of the propeller cover with a cutout to allow the gimbal cover to be installed/removed without removing the propeller cover. Everything else remains the same as the original.
