Summary

Mount a phone to a tripod.

[Gadgets](#) > [Photo & Video](#)

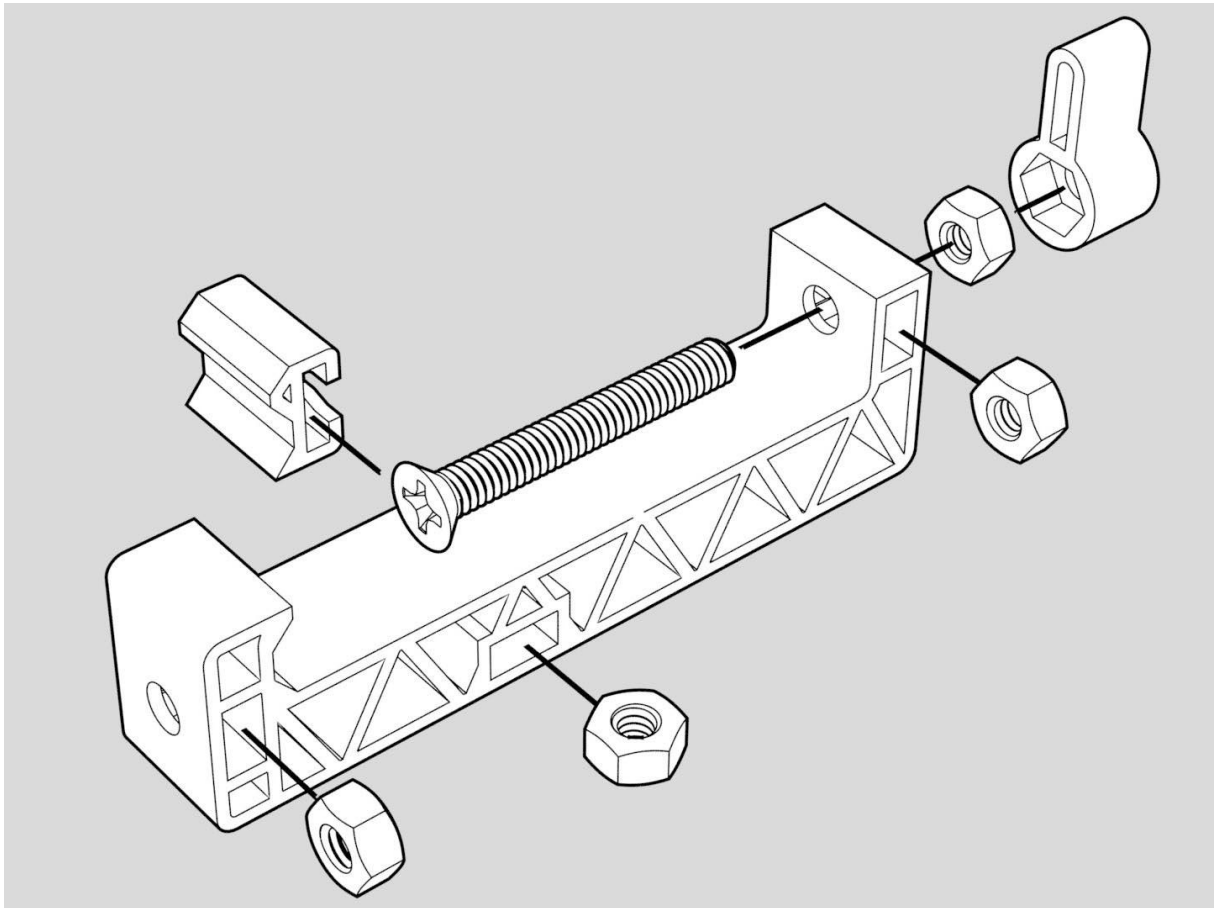

Tags: [phone](#) [tripod](#)

This should work with phones $\leq 83\text{mm}$ wide. 2 mounting points for portrait or landscape.

Print: .28 layer height and 15 walls. No top/bottom layers, infill or supports.

What you need: flat head 2" machine screw 1/4 -20 , 4 nuts, and glue.

Match the bottom nut thread to your tripod post.

Assembly:

press 3 nuts into the base

thread the screw into the top nut

snap the jaw onto the head of the screw

glue a nut on the end of the screw leaving 5mm of exposed threads

glue the handle onto the nut

Now channel your inner Ansel Adams...
