Summary

A desktop headphone stand. This model just barely fits onto a Prusa i3 Mk3 bed when rotated at 45°. Add color changes!

A desktop headphone stand. Designed to fit Sony WH-1000XM4 headphones.

This model just barely fits onto the print bed of a Prusa i3 MK3. Lay the model on it's back and rotate the it 45° around the Z-axis and hit the arrange button (shortcut "a"). The feet could probably be and inch or two shorter, but I like how stable with the longer legs.

If you have some filament to use up, I highly recommend adding some color changes to the print. I went with a mostly black print with a thin stripe of copper. The copper was just a few layers on either side of where the bevels on the back meet.

I also recommend adding rubberized feet to the bottom of the print to prevent the stand from slipping around on your desk.

Enjoy!
