Summary

A redesign of a UDM / UDR holder that while it looks nice was not structurally sound so I have reinforced the brackets

[Household](#) > [Office](#)

Tags: [shelf](#) [wall](#) [holder](#) [hook](#) [screws](#) [support](#) [router](#)
[bracket](#) [screw](#) [unifi](#) [mounted](#) [machine](#) [mounting](#)
[hole](#) [dream](#) [udm](#) [udr](#)

This is a reinforced version of UDM mount by Revnull. Who's design while elegant and well designed is lacking structurally. So to prevent a repeat of the brackets snapping I have redesigned it to have quarter circle reinforcements up each bracket this should serve to solve the problem.

I have also moved the screw holes because my particular use case required them shifted by about 5mm. I have kept the tracks for double-sided tape if required.

V1.3 fixes 2 problems a slight gap in the support and the lack of two holes
