Summary

A cat phone stand for all of us animal lovers. Works with variety of phones and tablets, can be scaled up too.

A cat phone stand for all of us animal lovers. Was originally posted on Thingiverse by I don't remember who, and when I wanted to reprint I couldn't find this model again so I uploaded the one on my computer to share it over here for more people to print and enjoy. Found it best printed at 110% size. For those who plans to use it with a tablet, scale it up bigger than 110% for more stability. Also works well for phones in landscape mode for consuming content!
