[creditcardholder](#) [cardwallet](#)

A slim and compact wallet designed to hold five **standard sized** credit cards. Press the lever to have your cards presented to you in a convenient stacked order. The built in retention mechanism keeps your cards secure. Only 8.5mm thick!

Add some extra stylish flair with the diagonally patterned version!

Make sure to properly level your bed as elephant's foot can easily fuse the mechanism together. The model was designed with 0.3mm clearances. No assembly required and should be printed without supports.

May not work as well if your cards have embossed/raised text

The lever is on the left side by default, mirror the model in your slicer to have it on the right side.

Feel free to modify the model to your needs with the included .step file and be sure to post any remixes and makes!
